# AI Equipment Documentation Management

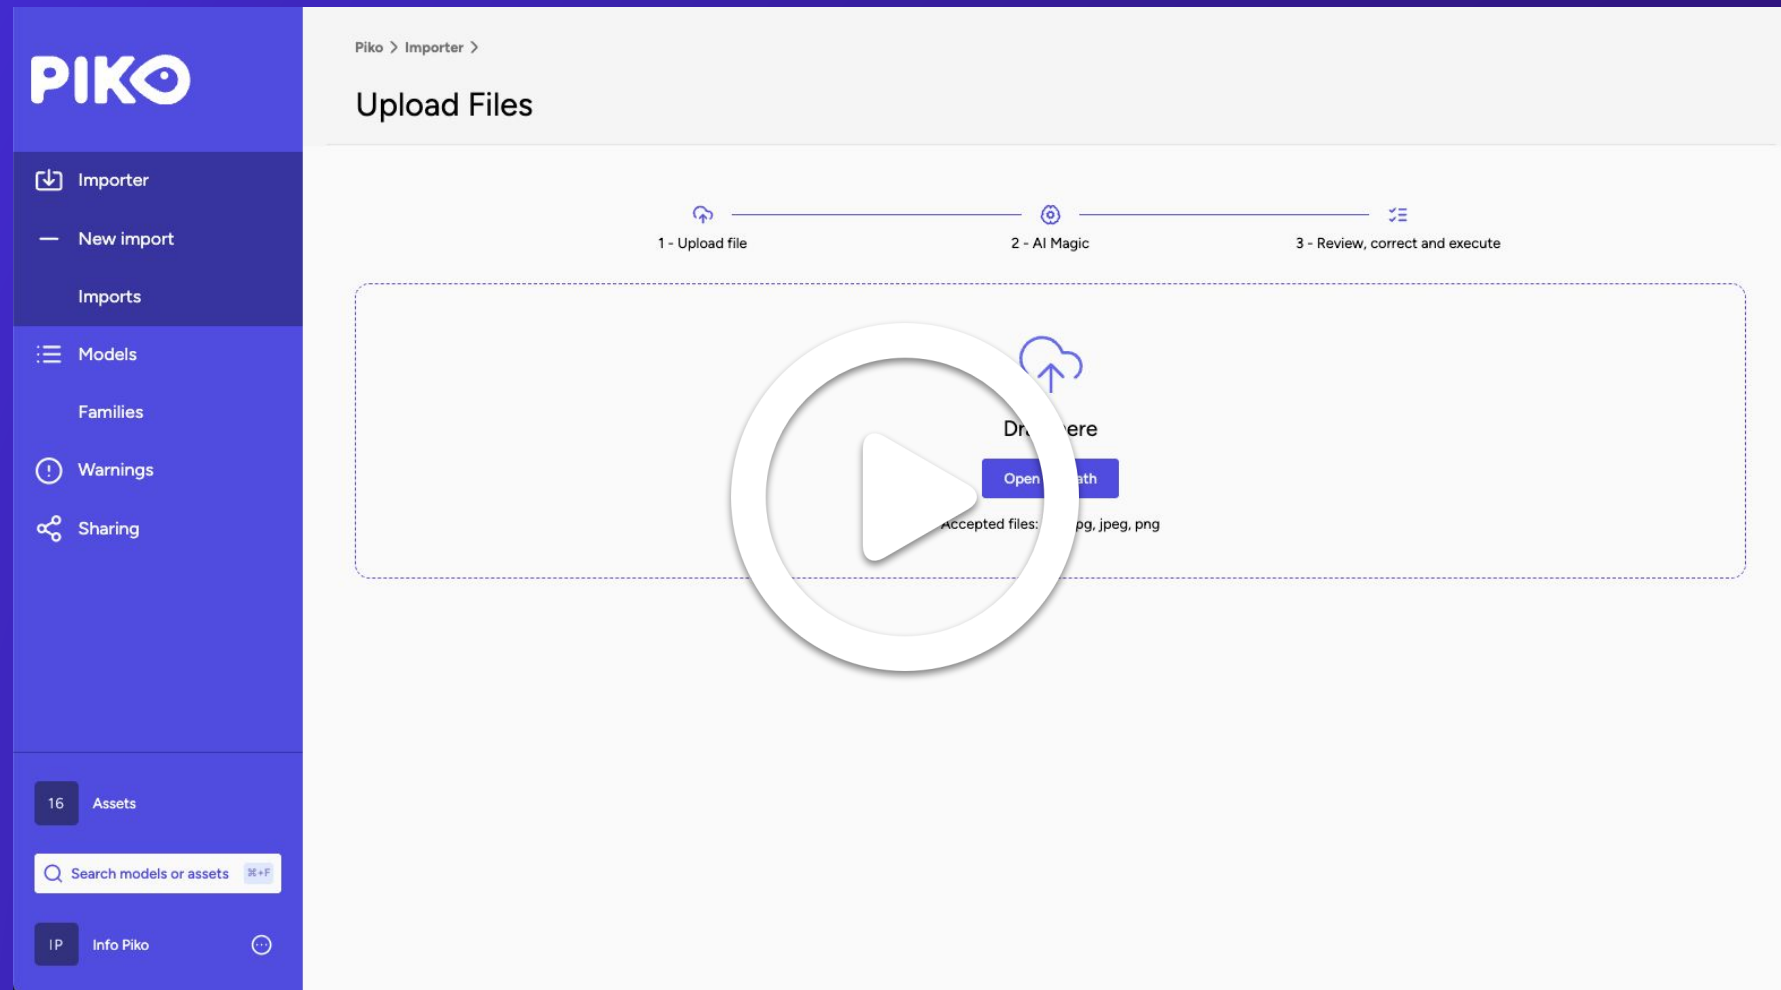

---

Discover Piko

Piko is the **AI software** for **managing machinery documents** that improves work efficiency and accuracy by reducing errors and eliminating the manual tasks of uploading and creating folders, thereby **increasing productivity**.

[See Piko's website](#)

# What can Piko do?

## Link documents to assets using AI

Replace the long, tedious, and repetitive task of **reading and classifying** construction machinery documents **with AI**. Be sure that all your asset are linked to their **correct documents!**

## Access documents from the machine

Ensure that the end users of the machinery can **access important information** such as user and maintenance manuals, relieving the rental company of the **responsibility** of delivering the documents.

# What can Piko do?

## Check compliance and expiration dates

**Monitor the compliance** of your machines' documentation with a smart tool that alerts you if a document is **missing**, **expired**, or **about to expire**.

## Share private docs with your customers

Allow end users to **access documents via QR codes** or by using **smart links** that provide **secure and temporary access** to the documentation of one or more machines.

# Integrate with Piko

Piko comes with a fully available **API environment** for integration!

-  **Connect** your systems to Piko
-  We integrate Piko and create **specific actions** for you!

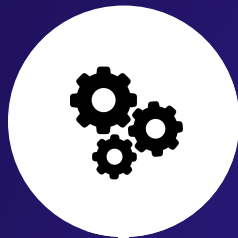

[See API documentation](#)

# Start working with Piko

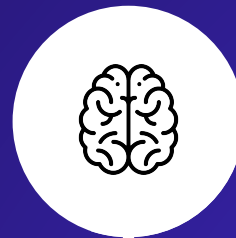

## Fleet import or API integration

We'll recreate the structure of your fleet on Piko, and you'll find your models and assets in place. We can use an .XLSX or .CSV file, or we can discuss an API synchronization together.

## AI Training

Piko's AI is trained in the construction machinery rental sector, but by using 10-20 examples for each type of document you want to use, we'll conduct specific training tailored to your needs.

## AI Magic

Let's take all your documents and give them to Piko! Piko will read and categorize them, so when you start using the software, every piece of information will already be in place.

## Linking machines

Use Piko's QR codes to link your machines to their profiles on Piko. You can print your own QR codes or use Piko's stickers. Access Piko with your smartphone and start the linking process.

## Useful information

-  Piko offers a **trial period** during which you can test all of its features.
-  Piko is **hosted in the cloud** in the European Union (Frankfurt), with a guarantee of **GDPR compliance**.
-  Recent **EU regulations** allow the use of **digital formats** for delivering documents to customers  
[Click here to see BBI statement for more information on regulations](#)

## Software-as-a-Service

-  Pay only for the assets present on Piko.
-  Nothing to install or maintain.
-  All updates and new features are included in the subscription.
